New claims 17 and 18 have been added to further define the security token of claim 1.

Claims 19 and 20 further clarify when claim 1's transaction identifier is generated.

Claim 21 clarify an aspect of how a transaction identifier is used; "allowing the user to interactively add and remove commodities to be purchased via the transaction session during different client-server exchanges that are linked by the transaction server as a single session by the transaction server using the displayed session identifier".

CONCLUSION

There being no further outstanding objections or rejections, it is submitted that the application is in condition for allowance. An early action to that effect is courteously solicited.

Finally, if there are any formal matters remaining after this response, the Examiner is requested to telephone the undersigned to attend to these matters.

If there are any additional fees associated with filing of this Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,
